

## ABOUT THE STATE

Happenings of Interest from Different Sections.

Mrs. Electa Baker of Hartsfordville observed the 80th anniversary of her birth May 31.

Jesse T. Weatherhead, 71, a well-known Guilford farmer, died a few days ago of necrosis of the jaw bone, resulting from an infected tooth. Mr. Weatherhead had been a member of Watkinson lodge of Odd Fellows for 50 years.

The Baptist church of Richford was dedicated last Sunday after five months of extensive repairs amounting to \$6,000. At this service a piano, the gift of Mr. and Mrs. Charles A. Powell, in memory of their daughter, was dedicated to the service of the church.

A Metz touring car owned by Joel W. Pierce of Bennington was completely destroyed by fire a few days ago, the blaze starting while Mr. Pierce and his children were in the machine. The youngest child was burned about the face before her father had time to throw her out of the auto. There was insurance on the car.

The Connecticut River Power company has set out 100 willow trees at Brattleboro, hoping thereby to prevent the river washouts. Ever since early in the spring, when a large washout occurred near the factory of the Vermont Lumber Block company, the Connecticut River Power company has had two self-dumping trucks and a gang of men making the fill.

Marjorie Caroline Winnie, formerly of Bellows Falls, grand opera singer, who last year married Carl S. Lowe in New York City, reached Bellows Falls the first of the week and will pass a portion of the summer with her parents, Mr. and Mrs. F. C. Winnie, in Denmark, last week, where she went soon after her marriage. She has visited Russia and Mr. Lowe, who is still abroad, has business interests which require frequent visits to that country.

Edward Daniels, who lives between Castleton Corners and Hubbardston, was the first person to kill a deer in the open zone established about the McCrae orchard in Castleton Corners. The animal was a big buck weighing 200 pounds. It was shot on Mr. Daniels' own property, which comes within the zone prescribed by the state fish and game commissioner. Although the zone was fixed more than two weeks ago and a number of hunting parties have traversed the space, only the one that Mr. Daniels shot has been secured thus far. It is thought the hunting has caused the deer to keep away from the territory, which was the intent of the law.

The two fine, wild black ducks that were liberated from the Arrowhead game yards in Milton this spring have both returned home, bringing young with them. One nested on the island in the river and was a familiar sight flying up and down the river in search of food and was supposed to have been confined there by his wild condition but surprised her friends by swimming the river with her young brood and is now raising the 10 strong youngsters in the shelter she has found preferable to her former wild freedom. The other nested in a neighboring brush patch and also returned home with seven as soon as she could make her way there.

## BLIND INVENTOR.

Former Rochester Boy a Genius in New Ideas.

Frederick W. Prendergast, formerly of Rochester, now of Cambridge, Mass., has an apparatus which his inventor asserts promises to recover any sunken ship that can be located. Blind since youth he believes he has solved a method for salvaging ships. The principle of the invention is embodied in an expansive cradle formed by air-tight inflatable bags, engaged with a weighted cable, which can be lowered into positions around the submerged hull and confined there by a locking device. When inflated the bags adjust themselves closely to the sides of the hull, lifting it up to the surface. These bags, or pontoons, are made of any inflatable material, such as heavy canvas, made air-tight and water-tight with rubber, and in any size needed. Each bag is provided with a fabric sheath woven from heavy cord or rope, through the lower edge of which the cable passes. A spiral weave with unit of rope is used to give strength to the sheath. Tubes are provided for admitting air.

The inventor points out wherein a cradle formed of yielding pontoons possesses notable advantages for this purpose over those of a metal. Ordinarily heavy steel cylinders have to be towed into position over the wreck, filled with water to sink them, then pumped out before air can be forced in. Divers often find it a matter of extreme difficulty and danger to harness them up to the wreck, and months may be consumed in the task.

It adds to the interest of these inventions that the man who worked them out has been blind almost since childhood. In spite of that handicap, Frederick W. Prendergast has done a great deal of mechanical work. He went to Massachusetts from Vermont about 20 years ago. His early life was spent on a farm near Rochester, where later he built, and for a number of years, operated a sawmill, getting out lumber from shingles. Whenever short of help, he was able to run the saws and planer himself and to take care of them, doing his own filing and setting. It is considered quite difficult to set planer, since the knives have to be very exact in order to do smooth work.

## RUTLAND GRAIN LIST GROWS.

Shows Gain of \$7,109.73 Over That of 1918.

Rutland, June 4.—The grand list of the city of Rutland for 1919 has just been completed at the city clerk's office, the board of assessors having finished their work of taking in inventories a short time ago. The grand list compares to \$120,854.58 in comparison with \$113,744.85 last year, showing a gain of \$7,109.73. The value of taxable real estate is \$305,940 more than in 1918 and there is a gain of \$31,233 in personal property. The number of taxable polls is 4,325, whereas there were only 4,106 in 1918.

The aggregate value of taxable real estate at present is \$85,053,188, while in 1918 it was \$77,747,248. The personal property to be taxed is appraised at \$3,167,270. The value of personal property last year was \$2,806,037. The new quadrennial appraisal is largely responsible for the increase.

## IS STRANGELY MISSING.

Robert T. Lapp, Traveling Salesman, Disappeared Last Week.

Brattleboro, June 4.—Robert T. Lapp, traveling salesman for Ingersoll Brothers of New York, Ingersoll watch makers, was in Brattleboro on Tuesday night of last week, staying at the Brooks house, going from here to Bellows Falls, and since Wednesday night he has not been seen or heard from in that town. His automobile, in which he had been traveling, was found Friday against a fence two miles north of Bellows Falls, and it is thought that in a collision he was thrown into the Connecticut river and drowned.

Laundress F. C. Willis of the Hotel Windham in Bellows Falls has been busy sending telegrams and answering telephone inquiries regarding the mysterious disappearance.

Lapp visited the trade in that village Wednesday and that afternoon left in his Ford to visit Springfield, saying that he would be back to the hotel to occupy his room that night. When nothing had been heard of him Friday afternoon, Mr. Willis made inquiry and found that Lapp's automobile had collided with the fence a couple of miles north of Bellows Falls on the New Hampshire side of the Connecticut on the return trip, presumably Wednesday night. A fence post was knocked over, the headlights broken and the box in the rear had been broken into and books and correspondence were scattered about. At the place where the accident happened it is only 10 or 15 feet from the Connecticut river. Mr. Willis' theory is that Mr. Lapp was thrown into the river and lost his life by drowning. He wrote to the house in New York City, but because of a holiday and Sunday, did not get a reply until Monday, stating that they knew nothing of Mr. Lapp's whereabouts. An effort was made to reach his wife at the home in Wakefield, Mass., but it was found that she was visiting her parents in New York City. It was found that Lapp was a member of Somerville council of United Commercial Travelers of America. The river may be dragged.

Edward Daniels, who lives between Castleton Corners and Hubbardston, was the first person to kill a deer in the open zone established about the McCrae orchard in Castleton Corners. The animal was a big buck weighing 200 pounds. It was shot on Mr. Daniels' own property, which comes within the zone prescribed by the state fish and game commissioner. Although the zone was fixed more than two weeks ago and a number of hunting parties have traversed the space, only the one that Mr. Daniels shot has been secured thus far. It is thought the hunting has caused the deer to keep away from the territory, which was the intent of the law.

The two fine, wild black ducks that were liberated from the Arrowhead game yards in Milton this spring have both returned home, bringing young with them. One nested on the island in the river and was a familiar sight flying up and down the river in search of food and was supposed to have been confined there by his wild condition but surprised her friends by swimming the river with her young brood and is now raising the 10 strong youngsters in the shelter she has found preferable to her former wild freedom. The other nested in a neighboring brush patch and also returned home with seven as soon as she could make her way there.
